PROFESSIONAL SUMMARY

Aspiring Software and AI Engineer with formal training in Software Engineering with Python from Refactory Academy and ongoing specialization in Software & AI Engineering at Turing College. Passionate about building scalable backend systems, AI-powered applications, and solving real-world business problems using technology.

Skilled in Python, Django, HTML, CSS, SQL, Git, and modern software engineering practices. Combines strong business operations experience with technical development skills to design practical, user-focused digital solutions.

EDUCATION

Turing College

Software & AI Engineering | In Progress

- Backend Development
- Machine Learning Foundations
- AI Engineering & Systems
- Software Engineering Practices
- Collaborative Development

Refactory Academy

Certificate in Software Engineering with Python | 2026

- Python Programming

- Django Web Development
- REST APIs
- Git & GitHub
- Database Design & Management
- Software Engineering Principles

University Education

Bachelor's Degree in Business Administration | 2025

- Project Management
- Strategic Planning
- Operations Management
- Business Analysis

KEY PROJECTS

Nyondo Hardware – Inventory Management System (Python, Django, SQL)

- Built a backend inventory management system using Django
- Implemented authentication, CRUD operations, and database management
- Designed business modules for stock control, supplier credit tracking, and sales reporting
- Applied Django ORM for efficient and scalable database interactions

VIDEX – Video Management Platform (Python, Django, HTML, CSS)

- Developed a dynamic web application for managing video content
- Designed a structured dashboard with a responsive video grid layout
- Built reusable Django templates and validated user input through forms

BE HER – Youth Leadership Website (HTML, CSS)

- Designed a responsive website for a youth empowerment organization

- Built clean UI with intuitive navigation for mentorship and leadership programs
 - Focused on mobile-first design and accessibility
-

PERSONAL PORTFOLIO PROJECT

Python, Django, HTML, CSS

- Developing a responsive portfolio to showcase projects, skills, and certifications
 - Implementing modular Django architecture and static file management
 - Creating dynamic content sections for technical writing and project updates
-

EXPERIENCE & LEADERSHIP

Technical Writer | Medium

- Write beginner-friendly technical articles on Artificial Intelligence
- Topics include AI fundamentals, prompt engineering, embeddings, and autonomous agents
- Translate complex technical concepts into simple, structured explanations

Student Leader

- Led group academic and extracurricular activities at university level
 - Coordinated teamwork and ensured successful project delivery
 - Strengthened leadership, communication, and collaboration skills
-

CORE SKILLS

Programming Languages: Python, HTML, CSS, SQL, JavaScript (Basic)

Frameworks: Django, Django REST Framework

Databases: SQLite, PostgreSQL

Tools: Git, GitHub, VS Code, Postman, Docker (Learning), Cloud Deployment (Learning)

AI & Systems: Machine Learning, RAG, Embeddings, Prompt Engineering, AI Agents (Learning)

Business Skills: Business Analysis, Procurement, Project Management, Operations Management

CERTIFICATIONS & ACHIEVEMENTS

- **Certificate in Software Engineering with Python – Refactory Academy (2026)**
 - **Software & AI Engineering Program – Turing College (In Progress)**
 - **Transitioned from Business Administration to Software & AI Engineering through hands-on technical training and project development**
-

LANGUAGES

- **English – Professional Working Proficiency**
 - **Luganda – Fluent**
 - **Luo – Fluent**
-
