

JOAN ATIMANGO

Software & AI Engineer

Kampala, Uganda (UTC+3) | atimangojoan85@gmail.com | +256 783404315

[linkedin.com/in/atimango-joan-826575270](https://www.linkedin.com/in/atimango-joan-826575270) | **Open to remote roles: full-time or part-time**

PROFESSIONAL SUMMARY

Junior Software & AI Engineer building LLM-powered applications and Python backends with Django and Flask. Won 1st place with Bagga, a multi-channel event communication platform, at the Africa's Talking Women in Tech hackathon (September 2026). Combines hands-on engineering with a business administration background in operations and project management.

SKILLS

Core: Python, Django, Flask, SQL, HTML, CSS, Git & GitHub, Postman

AI & LLMs: LLM APIs (Gemini, OpenRouter), prompt engineering, RAG & embeddings, machine learning foundations, AI agents

Integrations: Africa's Talking (USSD, SMS, Voice, Airtime), NewsAPI, REST APIs

Familiar with: Django REST Framework, PostgreSQL, SQLite, MongoDB, JavaScript, Docker, cloud deployment, IoT & embedded systems (Arduino)

Languages: English (professional), Luganda (fluent), Luo (fluent)

PROJECTS

Bridge: AI-Powered Digital Safety Platform 2nd Runner-Up, Africa's Talking Hackathon, Aug 2026

Python, Flask, Gemini AI, Africa's Talking APIs, Sunbird AI, SQLite

- Built a mobile money fraud and digital safety helpline reachable by web, USSD, SMS and live voice-call screening, usable on any phone with or without internet.
- Integrated Google Gemini for real-time scam guidance and structured risk classification.
- Created a community-driven scam-number reputation database and multi-language support through Sunbird AI translation.

Bagga: Event Communication & Feedback Platform 1st Place, Africa's Talking Hackathon, Sept 2026

Frontend & dashboard lead. Flask, MongoDB, Gemini API, Africa's Talking (USSD, SMS, Voice, Airtime), Bootstrap

- Won 1st place at the September 2026 Africa's Talking Women in Tech Event Management hackathon in Kampala, as part of a four-person team.
- Built the real-time organiser dashboard showing live attendee feedback, high-urgency alerts and channel status, with direct SMS replies and broadcast messages to attendees.
- Platform lets attendees give anonymous feedback by USSD, SMS or voice with no internet needed; Gemini classifies each note by category and urgency, and an airtime reward encourages useful feedback.

Nyondo Hardware: Inventory Management System Python, Django, SQL

- Built a Django inventory system with authentication, CRUD operations and modules for stock control, supplier credit tracking and sales reporting.
- Used the Django ORM for efficient, scalable database interactions.

EDUCATION & TRAINING

Turing College: Software & AI Engineering July 2026 – Present

Backend development, machine learning foundations, AI engineering & systems, collaborative development

Spiro Academy: Internet of Things & Embedded Systems 2026 – Present

Arduino programming, sensors and actuators, IoT system and connectivity design

Refractory Academy: Certificate in Software Engineering with Python March 2026 – June 2026

Python, Django, REST APIs, Git & GitHub, database design, software engineering principles

Makerere University: Bachelor's Degree in Business Administration Graduated 2025

Project management, strategic planning, operations management, business analysis

EXPERIENCE & LEADERSHIP

Technical Writer, Medium medium.com/@atimangojoan85

- Write beginner-friendly articles on AI and software engineering, including prompt engineering, embeddings and autonomous agents, turning complex concepts into clear, structured explanations.

Student Leader, Makerere University

- Led group academic and extracurricular activities, coordinating teamwork and delivery of projects.
